You're correct that personnel, especially RMs, is looking very tight in August & September. I've given Marilyn and Jim Davis a heads up that you and Duc are talking (much appreciated) about sharing Byron. If that is something you are sure you and Duc can work out, then we should get Byron involved soon. I would suggest he attend the site walk next week instead of me if possible. However.....if you think there is any chance you will cancel Carpenter for this year, I would like to hold on to GK and RnB until the last minute. Those projects fit perfectly into my schedule at Golf, I like the work/location, and really don't want to end up demo'ing trailers on a rez because I gave someone else my good projects.

Matt,

My plan is to get the R n B project funded for ERRS to help get the site ready for the Packer Testing in September. We can discuss timing but personnel appears to be an issue too – what's your thought on that ?

(If you want to contact Byron and we can talk that's fine too.)

Steve
